

Benefits of WMSOne

In today's competitive marketplace, the primary focus of many organizations is on improving customer service.

One proven method for increasing customer service without incurring additional long-term expenses is the implementation of **WMSOne**. **WMSOne** helps reduce inventory costs while increasing overall efficiencies. Implementing **WMSOne** is a cost effective approach enabling companies to achieve a higher return on their software dollars and provide the best possible service to their customers.

Extending SAP Business One Functionality

While SAP Business One transparently integrates inventory and accounting transactions, supporting multiple warehouses, inventory transfers, picking and packing, **WMSOne** provides an additional layer of functionality.

Zones, Aisles, Bins and Direction definitions coupled with pre-defined strategies and rules streamline the picking, packing, shipping, staging and put-away processes.

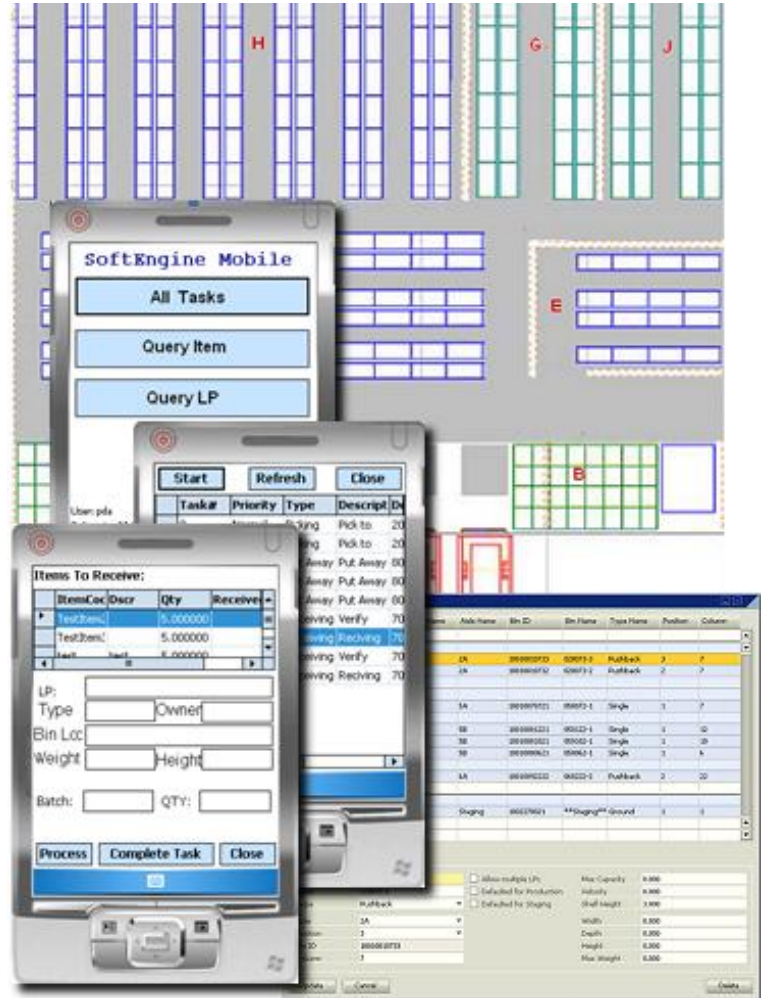

Integration with hand-held's and bar code devices help to eliminate errors, while improving overall inventory accuracy.

Eliminate your quarterly or yearly wall to wall physical inventory with Cycle Counting.

Using consigned inventory or fulfillment centers? No problem with **WMSOne**. Automate picking and packing from both internal and remote warehouses.

Information you need, when you need it!

Strategically placed PC's/Terminals coupled with Hand-Held's ensure transactions occur real-time, giving you access to the information you need when you need it.

WMSOne helps companies gain efficiencies and improve operations by streamlining;

- ❖ Receiving Tasks
- ❖ Put Away Tasks
- ❖ Picking Processes
- ❖ Product Staging Tasks
- ❖ Packaging and Palletizing Tasks
- ❖ Shipping Tasks
- ❖ Replenishment Tasks
- ❖ Inventory Transfers
- ❖ Cross Docking
- ❖ Bar Code Enablement
- ❖ Hand-Held Readers and Reporting Tools
- ❖ Automated Inventory Alerts
